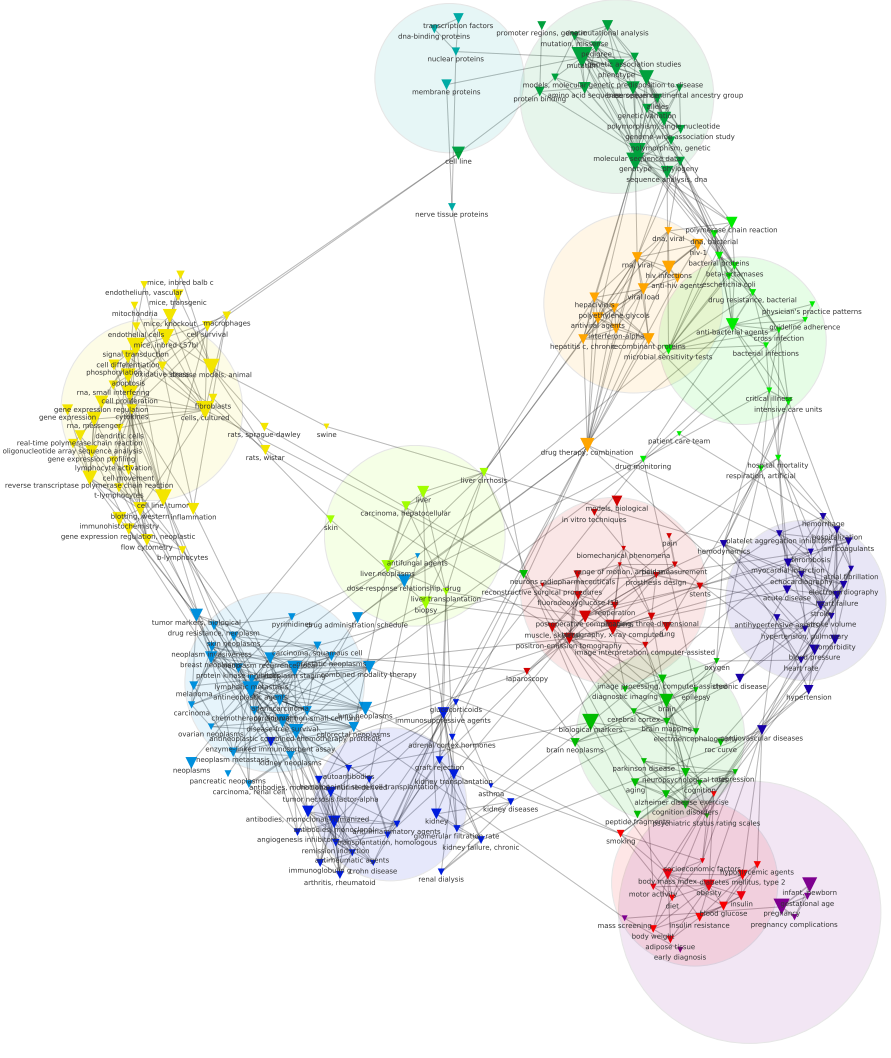
2010-2015



transcription factors
dna-binding proteins
nuclear proteins
membrane proteins
cell line
nerve tissue proteins
promoter regions, genetic
mutation, missense
mutagenesis
mutation
phenotype
genetic variation
polymorphism, single nucleotide
genome-wide association study
polymorphism, genetic
molecular sequence data
genotype
phylogeny
sequence analysis, dna
polymerase chain reaction
dna, viral
dna, bacterial
hiv-1
rna, viral
hiv infections
anti-hiv agents
viral load
hepatitis c
polyethylene glycols
antiviral agents
interferon-alpha
hepatitis c, chronic
drug resistance, bacterial
anti-bacterial agents
microbial sensitivity tests
bacterial infections
physician's practice patterns
guideline adherence
cross infection
critical illness
intensive care units
mice, inbred balb c
endothelium, vascular
mice, transgenic
mitochondria
mice, knockout
macrophages
endothelial cells
cell survival
mice, inbred c57bl
signal transduction
cell differentiation
phosphorylation
disease models, animal
apoptosis
rna, small interfering
cell proliferation
gene expression regulation
cytokines
gene expression
rna, messenger
fibroblasts
cells, cultured
dendritic cells
real-time polymerase chain reaction
oligonucleotide array sequence analysis
gene expression profiling
lymphocyte activation
cell movement
reverse transcriptase polymerase chain reaction
t-lymphocytes
cell line, tumor
blotting, western
inflammation
immunohistochemistry
gene expression regulation, neoplastic
flow cytometry
b-lymphocytes
rats, sprague-dawley
swine
rats, wistar
patient care team
drug therapy, combination
drug monitoring
hospital mortality
respiration, artificial
liver cirrhosis
liver
carcinoma, hepatocellular
skin
antifungal agents
liver neoplasms
liver transplantation
biopsy
models, biological
in vitro techniques
pain
hemodynamics
biomechanical phenomena
range of motion, articular
prosthesis design
stents
reconstructive surgical procedures
fluorescein angiography
vaporization
postoperative complications
three-dimensional
muscle, skeletal
radiography, x-ray computed
positron-emission tomography
image interpretation, computer-assisted
laparoscopy
hemorrhage
blood loss, surgical
platelet aggregation inhibitors
anticoagulants
thrombosis
myocardial infarction
atrial fibrillation
echocardiography
electrocardiography
stroke
antihypertensive agents
blood volume
hypertension, pulmonary
comorbidity
blood pressure
oxygen
heart rate
hypertension
tumor markers, biological
drug resistance, neoplasm
pyrimidines
drug administration schedule
neoplasm invasiveness
neoplasm staging
breast neoplasms
protein kinase inhibitors
lymphoma, b-cell
melanoma
antineoplastic agents
carcinoma
chemotherapy, adjuvant
ovarian neoplasms
antineoplastic agents, phytogenic
enzyme-linked immunosorbent assay
neoplasm metastasis
neoplasms
pancreatic neoplasms
carcinoma, renal cell
tumor necrosis factor-alpha
antibodies, monoclonal, humanized
angiogenesis inhibitors
immunoglobulin g
arthritis, rheumatoid
glucocorticoids
immunosuppressive agents
adrenal cortex hormones
graft rejection
autoantibodies
antibodies, monoclonal
kidney transplantation
asthma
kidney diseases
kidney
glomerular filtration rate
kidney failure, chronic
renal dialysis
image processing, computer-assisted
diagnostic imaging
epilepsy
brain
cerebral cortex
biological markers
brain mapping
electroencephalography
cerebrovascular disorders
brain neoplasms
rac curve
parkinson disease
depressive disorder, major
aging
cognition
alzheimer disease
exercise
cognition disorders
peptide fragments
psychiatric status rating scales
smoking
socioeconomic factors
hypoglycemic agents
diabetes mellitus, type 2
body mass index
motor activity
obesity
diet
insulin
blood glucose
mass screening
insulin resistance
infant, newborn
gestational age
pregnancy
pregnancy complications
body weight
adipose tissue
early diagnosis
